DETAILED ACTION

Claim Objections

1. In claim 11, the expression "comprises any one of " is unclear. One acceptable form of alternative expression, which is commonly referred to as a Markush group, recites members as being "selected from the group consisting of A, B and C." See *Ex parte Markush* , 1925 C.D. 126 (Comm'r Pat. 1925).

Correction is required.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

Claim 1 is rejected under 35 U.S.C. 102(b) as being clearly anticipated by Hsu et al. (US 5,932,904).

Hsu et al. discloses a nonvolatile semiconductor storage device provided with a capacitor using a ferroelectric thin film (38), wherein the ferroelectric thin film is formed of LiNb₃ (col.4 lines 27-35). See Hsu Fig.6.

Art Unit: 2811

Claim 20 is are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Hartner et al. (US 6,438,019).

Hartner et al. discloses a nonvolatile semiconductor storage device comprising: a complex capacitor having a stack of first capacitor (C1) and a second capacitor (C2), wherein the first capacitor has a ferroelectric thin film (6) between electrodes (5) and (8), and the second capacitor has a dielectric thin film (7) between the electrodes (5) and (9). See Hartner et al.'s Fig.1.

Response to Arguments

3. Applicant's arguments with respect to claim 1 have been considered but are moot in view of the new ground(s) of rejection.

Allowable Subject Matter

4. Claims 5-15 are allowed.

5. The following is an examiner's statement of reasons for allowance: Summerfelt et al. (US 6,548,343) appears to be the closest prior art reference. However, this reference fails to teach that the complex capacitor including a dielectric thin film having a temperature dependency, in which a dielectric constant of the capacitor decreases an increase-in-temperature-in-an-operational-temperature-range-of-nonvolatile semiconductor storage device. Prior art of record fails to teach or suggest to incorporate these limitations into Summerfelt et al. to arrive at the claimed device.

Art Unit: 2811

6. Claim 11 also is allowed if it is rewritten to overcome above objection.

Conclusion

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
